

PCN Overview			
			
PCN Number	DHCOM-iMX6-015		
PCN Date	10 April 2026		
Type of Change	Change Component		
History			
Revision	Date	Description	Name
R01	04/02/2026	First draft	AG
R01	04/10/2026	Reviewed and released	SD

Change Information	
Reason of Change	End of life (EOL) for the 512Mbyte NAND flash memory.
Description of Changes	Qualification and introduction of the new eMMC flash. Current Flash: SkyHigh S34ML04G300TFI000 New flash memory devices: Winbond W29N04GVSIAA
Customer Impact	Both types of flash memory can be mounted in all modules with 512Mbyte NAND flash.
Suggested Measures	DH advises customers to validate the new product version carefully before its production release. Customer software should support both old and new types of flash memory. Please note that the validation of the new flash memory was performed using the u-boot-with-spl_nand_2.0.9.0_without_watchdog.imx or u-boot-with-spl_imx6_v2.4.0.0_nand_without_watchdog.imx bootloader. Other versions are unlikely to cause problems, but this has not been tested.
Logistics	Please ask your sales contact, if you have questions regarding this change scenario.
